AVALON DENTAL CARE

The skills and education of the Avalon Dental Care staff are designed to make your visit one that you always remember – for good reason! The well-being of our patients is our number 1 priority. No matter how detailed or extensive the treatment, we will explain every step to our patients, taking time to ensure that you understand before we do anything. We want you to be educated about what is going on.

Each of our staff members attends a high level of continued education to learn new technology and techniques, thereby better serving our patients. The more you know, the more you can take care of yourself.

Dr. Kelishadi has been nominated and received an award as one of the Top Los Angeles dentists. She has also been featured on the Dr. Oz show. She has been one of South Bay's premier cosmetic dentist since 1995. Dr. Kelishadi has developed her practice to create a truly one-of-a-kind experience for people looking to transform their smiles. She received her dental degree from University Of Southern California in 1994 and has completed advanced training in areas of Cosmetic, Implant, and Sedation dentistry as well as Invisalign training. She has an artistic hand and a gentle touch.

INVISALIGN

Traditional braces are not always met with the most positive reactions, including that of the wearer. Once they are applied, they must be worn day and night until they have done their job – and that could take years. Consider Invisalign, a clear way to straighten your teeth.

**FEEL CONFIDENT
IN YOUR SMILE.**

**ASK IF INVISALIGN IS
RIGHT FOR YOU ~ THE
CLEAR ALTERNATIVE
TO BRACES.**

 **invisalign®**

© 2010 ALIGN TECHNOLOGY, INC.

Invisalign gradually moves your teeth with a series of custom-made, removable, nearly invisible aligners. Its removability allows for you to maintain optimum hygiene and potentially improved gum health. Cleaning is quicker and easier than with traditional orthodontics, since there are no brackets or wires to clean around. Not only that, but you can still eat when you want!

*Start smiling more with Invisalign!

COSMETIC IMPLANT, AND INVISALIGN DENTISTRY

The Cosmetic Dental Solution for Manhattan Beach, Redondo Beach, Palos Verdes, and the South Bay.

Looking for the very best in cosmetic, implants, restorative or family dental care? If you live in ElSegundo, Carson, Lomita, Redondo Beach, Torrance, Palos Verdes, Hermosa Beach or the Long Beach areas, welcome to your smile solution! At Avalon Dental Care, we're dedicated to providing you with personal attention and the safest, most comfortable dental care environment you'll find anywhere. We even have two convenient locations to serve you!

Here at Avalon Dental Care, we're not just about getting you the latest in veneers, crowns, whitening treatments, Invisalign or even dental implants. Dr. Kelishadi and her team of dental professionals will take the time to explain all possible treatment options to you. We understand it can be confusing, so we'll help you decide which option makes sense for your health and your budget. As one of the leading experts in Southern California dentistry, Dr. Kelishadi was in the top 10% of her class at University of Southern California. She continues to stay ahead of all the latest dental advancements, earning a reputation among her peers and her patients as an expert in all facets of modern dental care.

FILLINGS

Partials/Dentures

Sometimes, dentures are the best option to solve the problem of missing teeth. When properly fitted and designed, dentures — which are strong, comfortable and virtually indistinguishable from natural teeth — can provide extra chewing comfort, maintain facial structure and ensure added strength. To find out more about this option, please contact us today.

Root Canals

Each of our teeth contains a long, thin strand of dental pulp – which provides the tooth with nutrients and nerves-that extends down to the tooth's root. If the pulp becomes infected or injured, the tooth's nerves die and, often, without endodontic treatment, the tooth dies as well. Root canals are designed to save such damaged teeth. During the procedure a gap is drilled into the tooth's crown and pulp chamber, diseased pulp is reshaped or removed. To learn more about root canals, please contact us today.

COSMETIC DENTISTRY

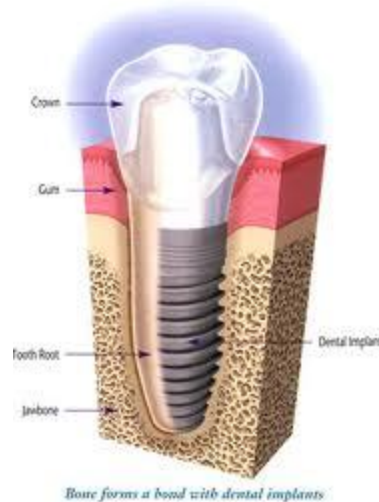

Tooth-Colored Fillings

Gone are the days when tooth ailments and cavities could only be treated with unsightly metal fillings. Today, modern, tooth-colored fillings made of durable resin or porcelain can be bonded to your teeth for a stronger, more natural-looking effect. These revolutionary fillings are virtually undetectable and are easy to apply. To find out if tooth-colored fillings are a good option for you, please contact us today.

Porcelain Veneers

An excellent alternative to crowns, veneers can perfect your smile by masking stains, hiding chips, correcting misalignment and creating uniformity. Veneers, which are made of thin, customized material designed to slide over the teeth, look incredibly natural, are long lasting and are relatively easy to apply. Please contact us today to find out more about veneers.

DENTAL IMPLANTS

In cases that involve the need for tooth extractions, a dental implant is a viable option. In addition to replacing teeth, implants can also serve as a platform to sustain other dental devices such as crowns and bridges.

Dental implants attach artificial teeth below the gum line using an anchor. The anchor holds the implant in place, allowing excess bone to fuse with it and the healthy gums to grow around it. The result is that of a strong, secure tooth that is virtually indistinguishable from natural teeth.

Because dental implants require surgery, they are intended only for candidates with sufficient bone and healthy gums. Meticulous planning must occur prior to performing dental implant surgery. This includes a consultation, x-rays and an oral exam to ensure the success of the implant.

For more information about dental implants, please contact us today.
